Divan – To dress up furniture

Similarity and contrast – this collection is a matchmaker between the styles.

Fine chenille yarns thread through the collection and create a velvet-like touch – cosy and comfortable is the result. The colours have been designed to coordinate and contrast alike. Design and structure offer a wide range of possibilities for combinations. The colour groups can be cool and fresh or powerful and strong, surely picking up the mood of summer.

The more harmony we can find with colours and structures the stronger the clash of styles.

Geometry and Ornamentic are entering a competition and will create a lively scene on any piece of furniture.

The combination of different styles and design elements, either similar or contrasting, provides the collection „Divan“ with the capacity to reflect a modern as well as a classical flair of living.
